

AUTOMATIONS CAPABILITIES SOFTWARE

KOZ solutions provide advanced warehouse automation, integrating seamlessly with existing systems for real-time visibility and enhanced efficiency.

The software automates tasks like order fulfillment, operational processes, packing, and shipping, reducing errors and enabling timely deliveries. KOZ empowers businesses with analytics for data-driven decision-making, contributing to operational enhancements. The scalable automation saves time and resources, allowing businesses to manage higher work volumes efficiently without additional manpower, thanks to KOZ.

VISIBILITY & CONTROL

WHICH SOFTWARE DOES WHAT?

- A warehouse control system (WCS) is software that supervises and controls all automated parts of a logistics operation. Digitization is crucial in a setting where automated warehouses are becoming more frequent for coordinating autonomous elements, facilitating decision-making, and supporting efficient dynamics.
- A warehouse execution system (WES) is a software application that synchronizes and controls a variety of automation and execution processes deployed in a warehouse or distribution center (DC), while also providing operations teams with real-time visibility of warehouse activities and resources.
- A warehouse management system (WMS) is software that assists businesses in managing and controlling everyday warehouse operations, from the time goods and resources enter a distribution or fulfillment center until they depart.

KOZ SOFTWARE

- KOZ is Systems in Motion's Automation Integration Software – warehouse execution system (WES) - that allows our automation to communicate to a customer's host WMS.
- KOZ connects source and warehouse automations. Being a single source of input for a variety of automations.
- KOZ streamlines operations by seamlessly integrating data and processes from different systems, eliminating the need for manual data flow and reducing the risk of errors.
- KOZ streamlines automations, tracks fulfillments, and offers real-time production monitoring for supply chain insights. Enhancing efficiency, cutting costs, and boosting productivity, it's a vital tool for today's businesses.

VISIBILITY & CONTROL

- The KOZ software screens are designed to be intuitive and user-friendly, ensuring they meet your operational and automation needs with ease.

KOZ TECHNOLOGY

- KOZ software modules are straightforward to integrate and configure to meet your operating and automation requirements.
- Standard Web Interfaces
- SIM Software Apps
- Windows operating systems
- iOS and Android
- Mac operating systems
- Linux operating systems

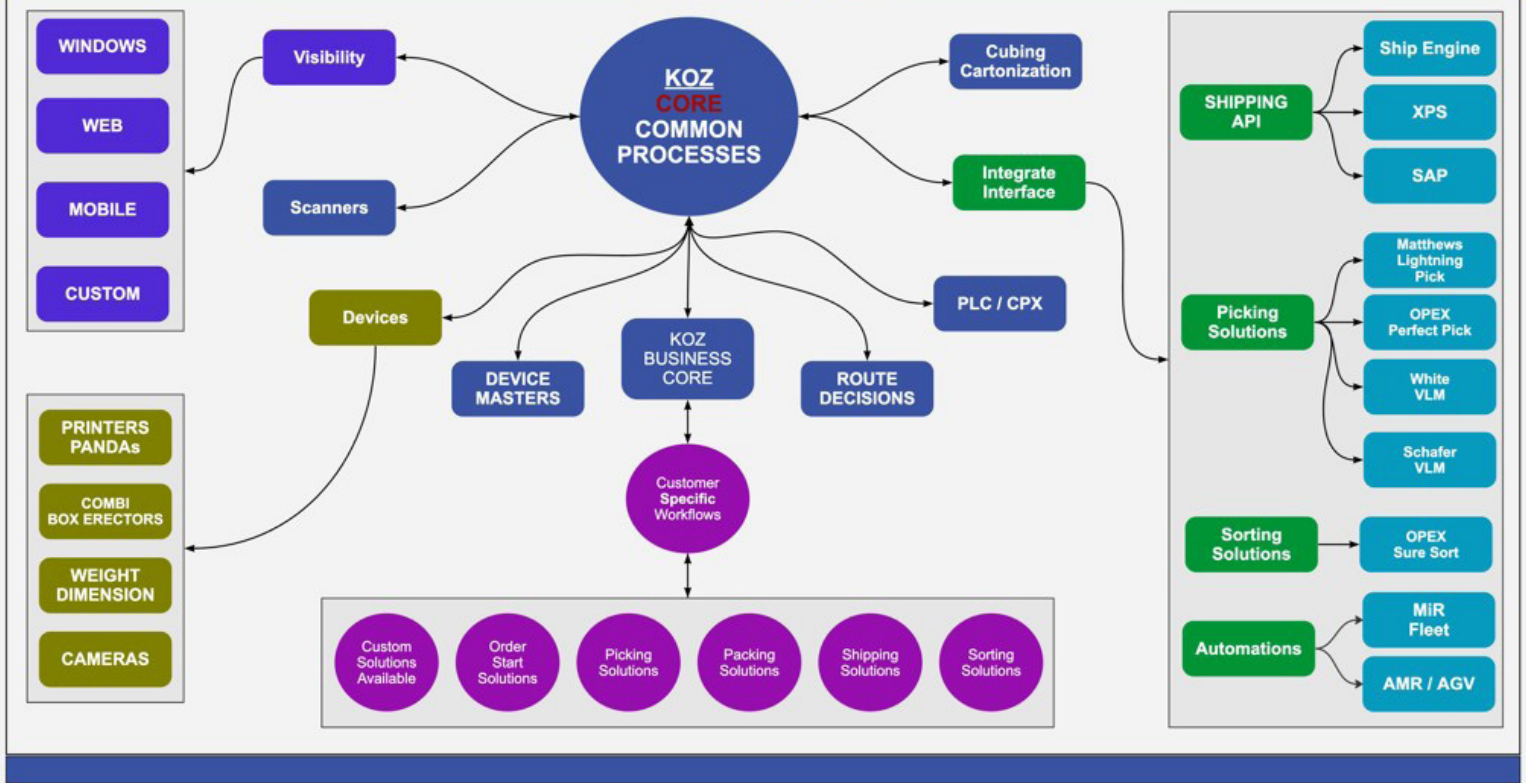

KOZ CAPABILITIES TO INTEGRATE WITH AUTOMATION AND ROBOTICS

Warehouse Management System (WMS) / Electronic Data Interchange (EDI)

KOZ Solutions Overview

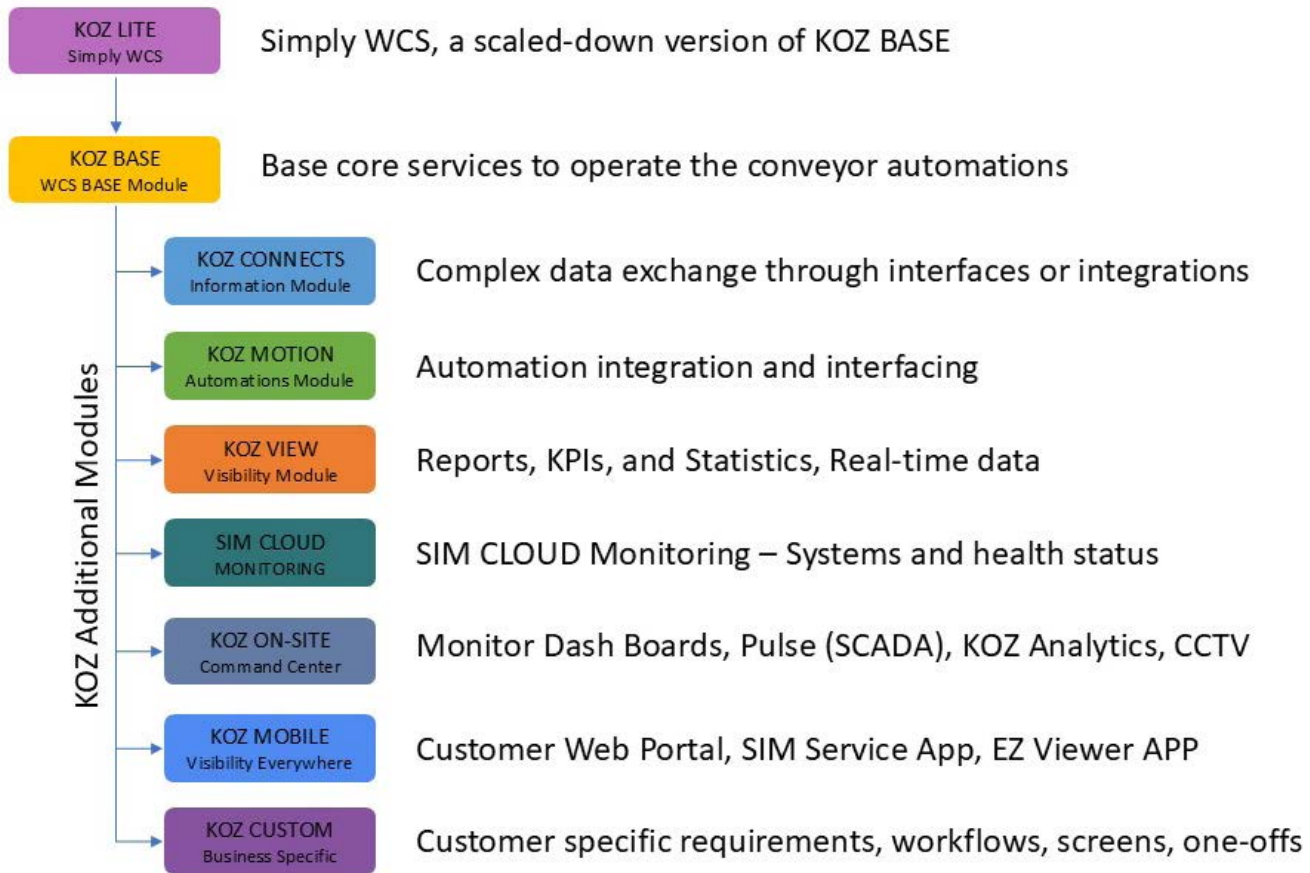

WHERE KOZ FITS

- WMS and Conveyor / Automation Solution
- CLOUD / MDF / On-Premise
- Warehouse / Distribution Center
- KOZ capabilities to integrate with Automation and Robotics

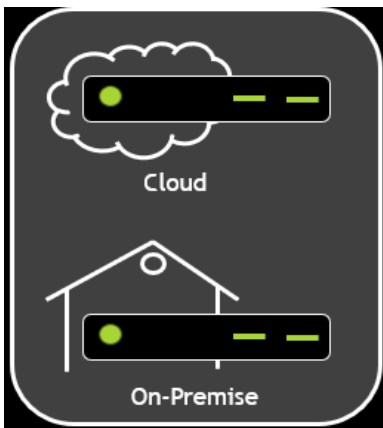

KOZ MODULES OFFERINGS

KOZ Solutions offers the right package to fit everyone's needs.

KOZ FLEXIBLE SOLUTIONS

- On the Cloud Capabilities.
- On-Premise Capabilities.

KOZ INTEGRATES WITH INDUSTRY TRUSTED NAMES
