# COMMAND CENTER SUPERVISORY INTERFACE

## COMMAND CENTER OVERVIEW

The Systems in Motion Command Center is your all-in-one hub for managing, monitoring, and optimizing every aspect of your material handling system. By integrating SCADA visualization, KOZ WCS/WES capabilities, and CCTV surveillance into one streamlined platform, it empowers operators and managers to make fast, informed decisions that keep operations running safely, smoothly, and efficiently. Whether you're overseeing daily performance or responding to unexpected events, the SIM Command Center delivers the visibility, control, and confidence you need—right at your fingertips.
