

## IS YOUR CONVEYOR SICK?

Just like people, conveyors show signs when they aren't feeling well. Ignoring the warning symptoms can lead to costly downtime, damaged products, and expensive repairs. The good news? Catching these issues early keeps your system running at peak performance.

Don't wait for a full breakdown.  
Schedule your conveyor check-up with Systems in Motion today.

## OUR SERVICES

-  24/7 SERVICE & SUPPORT
-  ON-SITE SERVICES
-  DEDICATED MAINTENANCE
-  TECHNICAL SUPPORT
-  SPARE PARTS

## COMMON SYMPTOMS

- AIR LEAKS - WASTING ENERGY & LOWERING PERFORMANCE
- OIL LEAKS - SIGNS OF WEAR THAT LEAD TO BIGGER FAILURES
- DAMAGED BELTS - CRACKS, TEARS, OR MIS-TRACKING ISSUES
- BAD ROLLERS - EXTRA FRICTION, DOWNTIME, PRODUCT DAMAGE
- MISSING O-RINGS - SMALL PARTS, BIG PERFORMANCE
- NOISY MOTOR/REDUCER - GRINDING OR SQUEALING = TROUBLE AHEAD

# WATCH OUT FOR THESE COMMON 5 SYMPTOMS:

- Your conveyor system is the backbone of your operation. But when parts start to wear, even small issues can grow into major problems. Recognizing the early signs of trouble can help prevent breakdowns, reduce repair costs, and keep production moving smoothly.
- Don't ignore the signs—small problems today can become big breakdowns tomorrow.

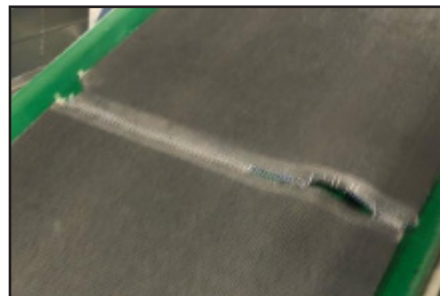

**Air Leaks**

**Oil Leaks**

**Broken or Damaged Belts**

**Bad Roller, Missing or Damaged O-rings**

**Noisy Motor/Reducer**

- If your conveyor is showing symptoms, it's time for a check-up. Call Systems in Motion—we'll get your system back in shape and running strong.
